

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

# **Building capacity and capability and operationalising IPE**

## **Day 2**

Funded by the Australian Government Office for Learning and Teaching

# Outcomes of the program

---

- Apply change leadership strategies to embed IPE in clinical settings
- Develop an action plan to facilitate/support IPE for students and colleagues in your setting

# Program agenda Day 2

---

- Readiness for interprofessional education/practice
- Change leadership theories
- Action plan
- Sustainability & next steps

# Example from Canada

---

<http://www.youtube.com/watch?v=JBQIW1xiSO0>

# Scenario

---

Imagine it's **2020** and **the Health Precinct** is highlighted by the government as the exemplar for interprofessional education and interprofessional practice. Students are clamoring to your site because of the learning they know they will receive. The partnerships are well established and true role modelling of interprofessional practice for students and staff is occurring.

## In your group

---

Describe what this practice setting that provides effective interprofessional education and interprofessional practice looks like.

- What is different about the way people work together?

# IPE/IPP cornerstone of health human resource strategy

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

**Advancing Teamwork in Healthcare will require a significant paradigm shift. It will require all stakeholders to be involved, engaged & willing to collaborate for change.**

**[www.healthforceontario.ca](http://www.healthforceontario.ca)**

# Organisational change

---

What would it take to transform the Health Precinct/Your  
Setting to one that supports interprofessional education  
and interprofessional practice?

# IP-COMPASS: Interprofessional Collaborative Organization Map and Preparedness Assessment Tool

Interprofessional Collaborative  
Organization Map and Preparedness  
Assessment (IP-COMPASS)

Kathryn Parker and Ivy Oandasan

<https://nexusipe.org/>

# The IP-COMPASS Framework

The 4 constructs:

- The organisation is committed to interprofessional practice (IPC)
- The organisation is committed to interprofessional education
- Structures and supports exist to facilitate interprofessional education
- Structures and supports exist to facilitate interprofessional practice

# Construct one: the organisation/unit

---

## 1. Commitment to interprofessional collaboration

### *Examples*

1.2 Interprofessional collaboration is part of strategic planning

1.3 Time, people & money are committed to interprofessional collaboration

1.4 Leaders promote interprofessional collaboration among team members

1.7 The effectiveness of interprofessional collaboration is measured

## Example (1.2) Interprofessional collaboration is part of strategic planning in the organisation

---

*When this attribute is strong...IPC is almost always considered when strategic-level decisions are made that impact (a) how care providers work together and (b) how clients/patients are cared for. These decisions might be at any level (e.g., organisation, program, department or unit).*

# Evidence...

---

- ***IPC is in formal planning documents, for example...***

Is IPC in the organisation's overarching strategic plan and/or 'scorecards'?

- In our clinical setting, this attribute is...

# Using the IP-COMPASS Tool

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

- Apply the IP-COMPASS to your context to reflect upon its readiness for interprofessional education and practice
- Choose the construct that most stands out to you (if time permits start another)

# Large group debrief

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

- 1) Describe your experience using IP-COMPASS.
  
  
  
  
  
  
  
  
  
  
- 2) What strengths did you identify demonstrating  
interprofessional education and practice?

# Leading from where you stand

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

# What do we mean by leader?

---

Margaret Wheatley defines a leader as:

***“Anyone who sees an issue or opportunity and chooses to do something about it .”***

The real work of leaders is to help people discover the power of seeing.

(Wheatley, 2009, p.144)

## 4 leadership theories/models

---

1. Professor John Kotter transformational change
2. Kouzes & Posner leadership practices
3. Appreciative leadership/inquiry positive  
organisational change
4. Bolman & Deal systems theory

# Kotter's 8 steps for transformational change

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

1. Establish a sense of urgency
2. Form a powerful guiding coalition
3. Create a vision
4. Communicate the vision
5. Empower others to act on the vision
6. Plan for & create short-term wins
7. Consolidate improvements & produce more change
8. Institutionalise new approaches – embed into organisation's culture

([www.kotterinternational.com](http://www.kotterinternational.com))

# Kotter's 8 accelerators of change

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

# Kouzes & Posner's model (2012) – exemplary leaders

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

## Model the way

- Clarify values
- Set the example

## Inspire a shared vision

- Envision the future
- Enlist others

## Challenge the process

- Search for opportunities
- Experiment and take risks

## Enable others to act

- Foster collaboration
- Strengthen others

## Encourage the heart

- Recognise contributions
- Celebrate the values and victories

# Appreciative leadership

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

## Appreciative Inquiry

Involves the art & practice of asking questions that strengthen a system's capacity to heighten positive potential

***Empowers others to act on a vision***

(Cooperrider & Whitney, 1999)

# Questions as a strategy

---

- The change has started simply by asking the question
- Questions can be used:
  - to gain and sustain momentum
  - to foster reflection

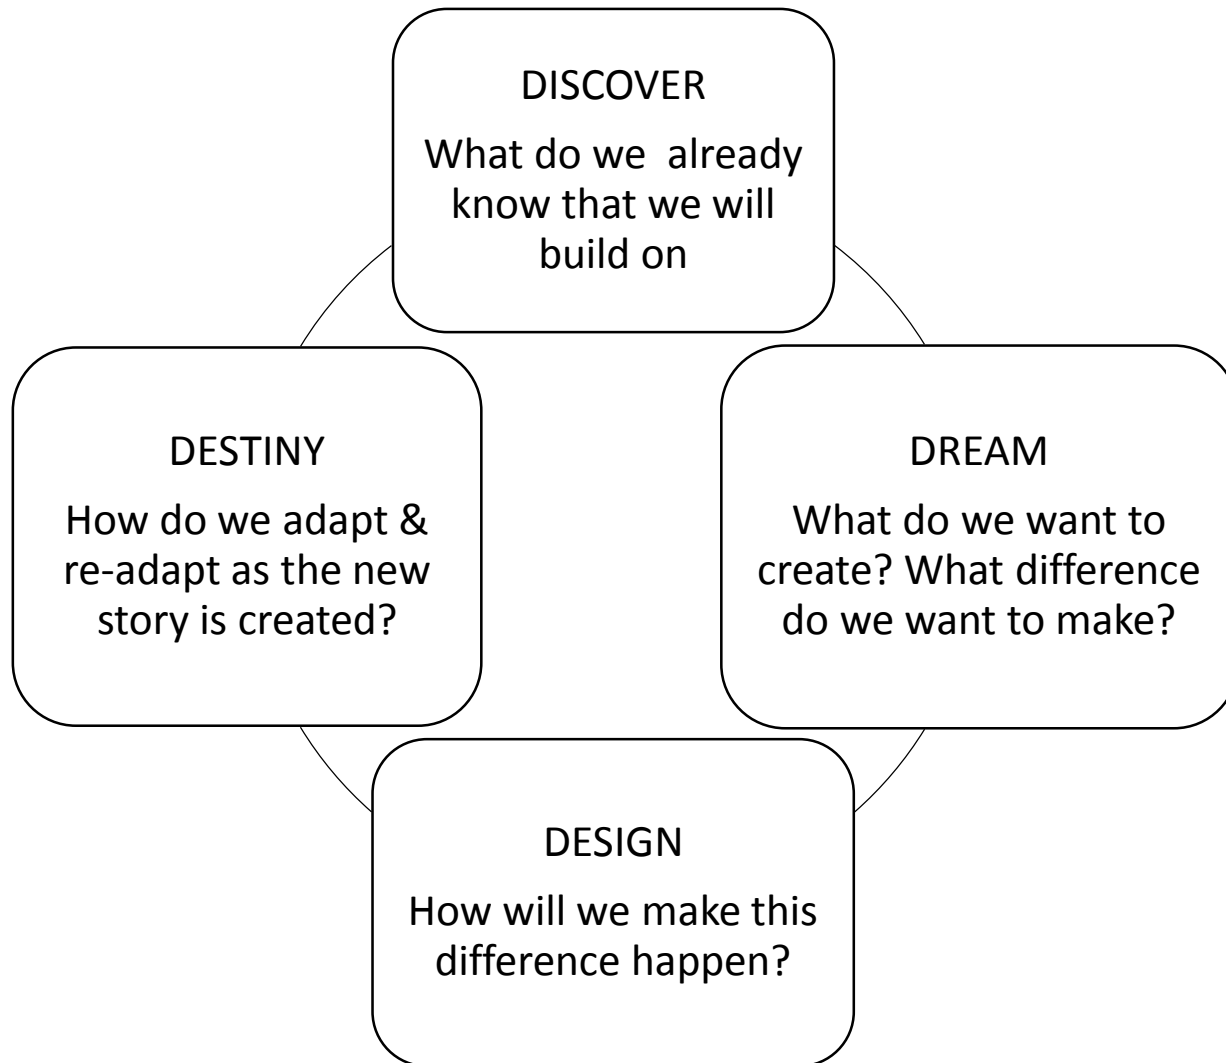

*“Organizations grow in the direction of what they are repeatedly ask questions about and focus their attention on”*  
(Bernard Mohr, 2001)

# Appreciative inquiry 4-D cycle

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

# Appreciative leadership

---

5 core strengths of an appreciative leader:

**Inquiry** – ask for others to contribute – sends message of valuing them

**Illumination** – show their strengths & how they can best contribute

**Inclusion** – collaboration, give sense of belonging

**Inspiration** – provide with a direction

**Integrity** – let people know they're expected to do their best & that they can trust others to do the same

(Whitney, Troston-Bloom & Rader, 2010)

# Systems thinking to understand complex situations

---

- A system is something that maintains its existence and functions through the interaction of its parts
- When dealing with a system you never do just one thing – system effects cross boundaries

# Leaders with multiple frames

---

Frame	The leader is a...	Key leadership processes
Structural	Social architect	Analysis and design
Human Resource	Catalyst, servant	Support and empowerment
Political	Advocate	Advocacy and coalition building
Symbolic	Prophet, poet	Inspiration, framing/sense making

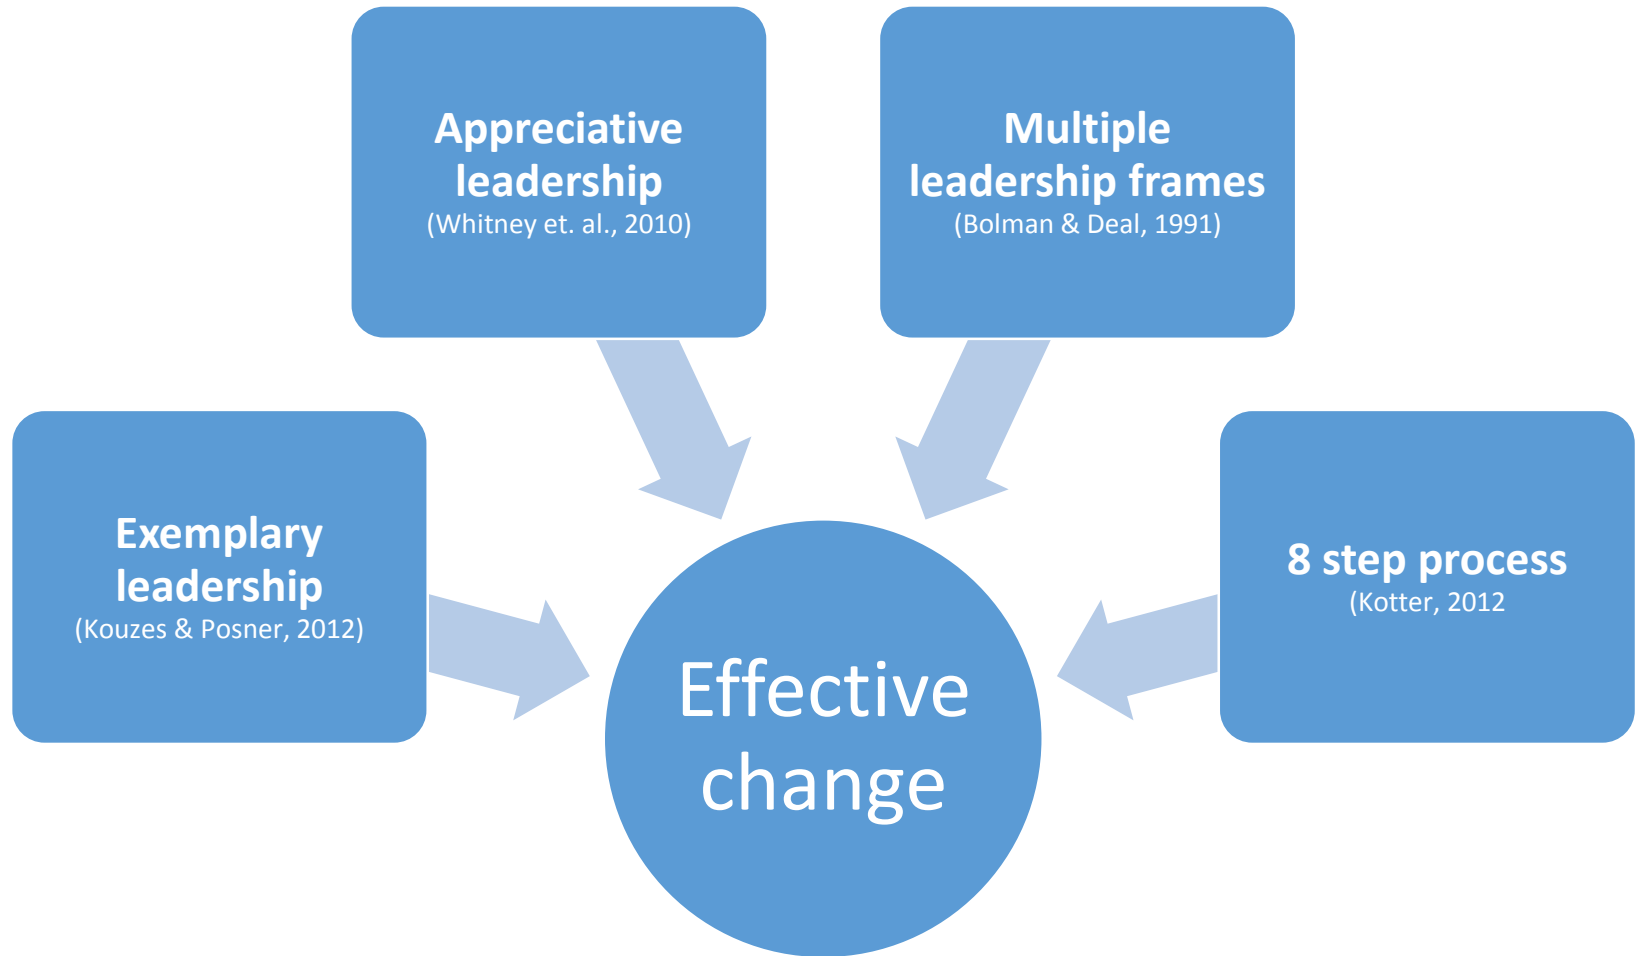

(Bolman & Deal, 1991)

# Using multiple change approaches

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

# Change curve

# Developing individual action plans

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

Develop an action plan for IPE that encompasses key aspects of this programme using the template provided:

- Effective IPE design and facilitation
- Organisational change including IP-COMPASS tool
- Leadership – Kotter's steps/accelerators, exemplary practices, appreciative inquiry, multiple frames

# Implementing action learning plans

---

Leading Interprofessional  
Collaboration  
HEALTH SCIENCES

- What barriers do you think you might encounter in making these changes?
- What support would assist you to successfully develop & implement your action plan?

# Top lessons learned

---

- Strong leadership support for interprofessional education and interprofessional practice
- Practice setting point person (interprofessional education Leader/coordinator)
- Strong partnerships
- Be prepared to address challenges (e.g. scheduling)
- Offer staff development programs & in situ-coaching
- Co-facilitation model is ideal
- Role-modelling is essential
- ***Build upon strong interprofessional collaborative teams***

# Plan for sustainability

---

- Engage the voices in your system
- Use multiple communication methods & venues
- Focus on a small number of changes
- Align with organisation's directions & priorities
- Establish peer support system
- Share stories of success – yours, clients' & students'
